Summary

Full-Stack Developer specializing in the MERN stack and Next.js, with hands-on experience shipping production-grade applications — including an AI-powered interview marketplace with real-time video and automated feedback, and a social platform with live messaging and video calling. Strong foundation in DSA and OOP, backed by 700+ problems solved across LeetCode, CodeChef, and Codeforces. Comfortable across the stack: TypeScript, Node.js, Express.js, PostgreSQL/MongoDB, and Docker-based deployment.

Education

Bachelor of Technology in Computer Science and Engineering
ABES Engineering College, Ghaziabad, Uttar Pradesh

Oct 2023 – July 2027
CGPA: 8.425 / 10

Skills

Languages: C, C++, JavaScript, TypeScript, SQL

Frontend: HTML, CSS, React.js, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap, shadcn/ui

Backend: Node.js, Express.js, REST APIs, JWT, Clerk (Authentication), Axios

Databases: MongoDB, PostgreSQL

AI/ML: Generative AI Integration

Tools & Platforms: Git, GitHub, VS Code, Postman

Computer Science Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks

Projects

MockMate: AI-Powered Interview Marketplace — *Next.js, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, Clerk, Stream SDK, Docker* **2026**

- Built a full-stack SaaS marketplace for scheduling mock interviews, with role-based dashboards, credit-based subscriptions, and interviewer payout management.
- Integrated real-time video calling, screen sharing, and session recording via the Stream Video SDK, along with AI-generated interview questions and automated feedback.
- Architected a scalable backend using PostgreSQL and Prisma ORM, with Clerk authentication and Dockerized deployment.

Vybe: Social Media Platform — *MERN Stack, TypeScript, TanStack Query, Stream SDK* **2026**

- Built a social media platform supporting posts, reels, stories, follows, likes, comments, and personalized feeds, backed by scalable Node.js/Express/MongoDB APIs.
- Implemented JWT-based authentication, real-time messaging with typing indicators and reactions, and one-on-one/group video calling using the Stream SDK.
- Optimized performance with TanStack Query for server-state caching and infinite-scroll feeds, and built a fully responsive, theme-customizable UI.

Achievements

- **Leetcode:** Solved 300+ questions — Contest Rating :- 1642
- **Codechef:** Solved 400+ questions — Contest Rating :- 1507
- **Codeforces:** Solved 20+ questions — Contest Rating :- 639
- **ACPC 2K25:** Ranked among the Top 10 teams out of 120 participating teams.

Certifications

- **HackerRank Certificate:** Problem Solving (Basic) – Jan 2025
